

ENERGY-EFFICIENT GREEN WINDOWS

Envirosealed Windows™ by Dove are energy-efficient, green windows. Their superior thermal efficiency allows homeowners to lower their energy bills and save money. But more importantly, their efficiency guarantees lower CO₂ emissions and a more positive impact on the environment.

In order to understand what makes Envirosealed Windows so great you have to understand the window spacer system inside.

The better the spacer the better the window, and Envirosealed Windows by Dove use the best spacers in the business.

Your Windows are 80% Glass.

It's important to choose a glass unit that will protect your home from losing indoor heat during the winter and absorbing outside heat in the summer.

Choose Low-E glass with argon or krypton to meet ENERGY STAR guidelines.

See a BETTER FUTURE

THROUGH OUR WINDOWS.

Window Type	Glass Configuration	U-Factor	SHGC
6000	7/8" Warm Edge D.S.	Lower is Better	Lower is Better
Double Hung	Clear/Air/Clear	0.45	0.54
	Low-E/Argon/Clear	0.30	0.27
	Low-E/Krypton/Clear	0.29	0.27

6000 Series
by Dove Vinyl Windows

6000 Series Features

- Fully fusion welded, multi-chambered 3 1/4-inch masterframe meets an R-50/DP-50 rating; one of the highest in the industry
- Equal lite sash design – Provides a clean and balanced appearance to the window unit
- Double strength glass in both sashes improves both energy efficiency and lowers sound transmission levels to keep exterior noises out
- A full-length, integral lift rail for both top and bottom sashes ensures easy operation
- Strategically placed, computer-designed metal reinforcements add strength and improve the overall structural performance
- Both aesthetically pleasing and security enhancing, the flush-mounted, recessed lock and keeper hardware is both beautiful and functional
- The full sash interlock provides an uninterrupted seal between the two sashes
- Impact-rated windows available
- Available with an integral nailing fin and J channel for future home additions and new construction buildings
- Additional new construction accessories available include New England trim kit and brickmold
- Dove Windows, with optional low-E argon, meet the ENERGY STAR guidelines for energy efficiency
- Manufactured with Duraseal™, a warm edge spacer designed with insulating pillows of air to further increase energy efficiency

Color Options

- Euro White
- Tan
- Natural oak or hillside woodgrain inside, white exterior.

Grid Options

- White - Flat or Contoured
- Woodgrain - Contoured white exterior only
- SDL Simulated Divided Lite

Outstanding Features... Outstanding Performance

You won't believe your eyes. This is not just another vinyl window. This is the 6000 Series from Dove Vinyl Windows. Engineered and crafted for today's discriminating homeowner.

Product Certified by the American Architectural Manufacturers Association (AAMA)

The quality of this window is unmatched in the industry. The vinyl profiles that are used in this window must meet stringent standards and must pass a thorough inspection procedure before certification. This insures that only the highest quality vinyl profiles are used in the construction of the 6000 Series windows.

Windows Tested to Insure Performance (AAMANWDA 101/IS.2)

This window has been fully tested by a certified, independent testing laboratory, and exceeds the minimum performance requirements specified for:

- Air Infiltration
- Water Resistance
- Structural (Design Pressure)
- Forced Entry

Double Slider Replacement Window ... a window designed to open up any room in the house

Easy to operate, no matter how large the window, this double slider will open even the largest room to a new light and distinctive style. Available in 2-lite or 3-lite configurations, in a number of panel and picture window sizes, this window can be designed to accommodate any size room or wall opening.

When you combine these configurations with custom shapes and sizes, you create new dimensions in living. Limited only by your imagination, the 6000 Series, all vinyl window system, can be sized and shaped to provide that unique look that sets your home apart from the others.

ENERGY-EFFICIENT GREEN WINDOWS

DURA PLATFORM SPACERS

Better-insulating glass spacers can improve a window's energy efficiency by up to 10 percent. Envirosealed Windows by Dove are made with Dura Platform spacers, providing homes with unsurpassed heating and cooling energy savings.

This, in turn, reduces the amount of CO₂ created and your impact on the environment. Dura Platform spacers consist of the most thermally efficient components, each of which plays an important role in improving energy efficiency.

- Structural Spacer – Second generation spacer technology with an aluminum spacer element
- Insulating Chambers – Pillows of air reduce energy loss through the spacer
- Three-Sided Continuous Moisture Barrier – Impermeable to gas and water vapor
- Bondline Adhesive – Durable, moisture resistant adhesive for prolonged UV and water exposure
- Encapsulated Dessicant – Protected layer of concentrated dessicant to prolong unit life

Picture Windows in Custom Shapes

There is no limit to the look you can give your home. Trapezoids, arches, triangles, pentagons, quarter rounds and half rounds. All are available to help you find that perfect combination.

You can be sure your windows and special shapes will fit perfectly, because each window is custom-made to precisely fit each window opening in your home.
